

1000 n8n Automation Workflows Pack

Basic (Free Sample) Edition

What's inside

- **50 n8n workflows** in ready-to-import JSON format
- Organized in 20 categories: AI Agents, Ecommerce, CRM, DevOps, Marketing, and more
- Interactive **INDEX.html** dashboard — search + filter offline
- Master **catalog.csv** + **catalog.json** for programmatic access
- Free tier — 5% of full pack, standalone useful
- Upgrade for full 1000 workflows, AI Agents Bonus, commercial license

How to import into n8n

1. Open n8n (self-hosted or Cloud)
2. Click **+** to create a new workflow
3. Top-right menu → **Import from File**
4. Select any **.json** from the **workflows/** folder
5. Configure your credentials (API keys) → activate

How to browse

Open **INDEX.html** in any browser — no install needed. Search by tool, category, trigger type, or use case. Every card links to the exact JSON file to import.

Compatibility

Works with n8n v1.0+ (self-hosted, Docker, or n8n Cloud). All nodes use core + community-standard patterns — no obscure dependencies.

Support

Broken file, corrupt download, or missing content? Email support with your order ID — we'll fix or replace within 24 hours.
